## 1 SCOPE AND PURPOSE

This document contains information about the certificates used at Auðkenni and complements the Certificate Policy and the Certification Practice Statement.

The purpose of this document is to provide one single place for specification of certificate contents. This serves to avoid inconsistency and contributes to a significant reduction of the risk for errors and misunderstandings in the maintenance of certificate contents.

### 1.1 Document structure

Chapter 5 lists contents of Islandsrot, Auðkenni Intermediate Certificate and Auðkenni certificates for Certificates on Cards, Certificates on Mobile, Certificates in App, Certificates in eSeals, Equipment Authentication and Time-stamping unit.

Chapter 6 lists the Auðkenni OCSP and CRL profile.

## 2 DEFINITIONS

Definition	Description
<PNO of subject> <PNO of subscriber>	An alphanumeric value representing the Personal ID Number or Identification Number of the Subscriber or Subject as defined in the Icelandic National Registry or the National Trade Registry.

<ID of subscriber>	ID of subscriber as recorded in the Icelandic National Registry. This is a ten-digit number in the form DDMMYY#### showing date of birth, sequence number, validation number and century. In case of an organization the format has ten digits in the form of ##MMYY####. In case of eSeals this number will have "NTRIS-" in front of the number.
<Subject given name>	Given name of subject is the name as recorded in the Icelandic National Registry.
<Subject surname>	Surname of subject is the name as recorded in the Icelandic National Registry.

<Name of Organization>	The name of the Organization as it in the National Trade Registry.
<App account number>	Account number within App on Smart device. A unique number.

Since Auðkenni uses the same intermediate CA to issue all types of certificates it is necessary to distinguish between different types. Auðkenni differentiates between certificates using unique OIDs in each profile. The OIDs are described in the following tables:
